## **Product/Service Use**

The website's content is not a substitute for direct, personal, professional medical care and diagnosis. None of the diet plans or exercises (including products and services) mentioned at [www.jbselite.com](http://www.jbselite.com) and/or from JBS Elite should be performed or otherwise used without clearance from your physician or healthcare provider. The information contained within is not intended to provide specific physical or mental health advice, or any other advice whatsoever, for any individual or company and should not be relied upon in that regard. We are not medical professionals and nothing on this website should be misconstrued to mean otherwise.

There may be risks associated with participating in activities mentioned on [www.jbselite.com](http://www.jbselite.com) for people in poor health or with pre-existing physical or mental health conditions. Because these risks exist, you will not participate in such diet plans if you are in poor health or have a pre-existing mental or physical condition. If you choose to participate in these risks, you do so of your own free will and accord, knowingly and voluntarily assuming all risks associated with such dietary activities. Such risks may also exist for those currently in good health.

When participating in any program supplied by JBS Elite, the participant fully assumes all risks from JBS Elite and release JBS Elite from all legal liability. Member's agree and understand that exercise programs by their nature carry a risk of injury and bodily harm and agree and understand that if they are unsure they should consult a local personal trainer or review videos online in order to best understand how to execute the correct form for each and every exercise. This will greatly reduce the risk of injury, but as with any exercise program, the risk of injury can never be totally eliminated.

Services supplied by JBS Elite are designed to be challenging, in order to assist in your body's transformation in composition. An important component of the training program is lifting heavy weights. Such activity is inherently risky, especially if done with poor technique. Poor technique can lead to experiencing muscle tears, pulls, sprains, dislocations, or other undesirable health consequences. Users assume all risks inherent with microwave cooking.

Products/Services offered by JBS Elite are no substitute for medical advice. Products/Services are used at your own risk and JBS Elite will not be responsible for any injuries, health problems or even death experienced as a result of their use. You must consult a certified doctor before beginning any meal plan or training programme.

## Results

While our products/services are intended to be fully implemented, and we work hard to ensure it's easy to do so, the typical user of virtually all education products treats them in much the same way they treat a book. The vast majority read or skim through it once, then do not implement the program or take any action based on it. The results of such education are intangible, and not measured in fat loss, muscle gain, abdominal definition, or other positive results of any kind. And even when consumers implement our product in full, it is possible that they will not report fat loss, muscle gain, abdominal definition, or other positive results. Fat loss, muscle gain, abdominal definition, or any positive results of any kind should be treated as a goal but not guaranteed. Consumers should not assume they will experience results. It is entirely possible you will gain fat, lose muscle, lose abdominal definition, or experience other outcomes as a result of advice given.

## Testimonials

The purpose of testimonials is to show visitors what can be achieved with the assistance of JBS Elite's services. There are a variety of factors that will also influence results including but not limited to: genetics, exercise history, gender, motivation and dedication. Testimonials on JBSElite.com have been forwarded to us by users of the services offered by JBS Elite, and may not reflect the typical purchaser's experience, may not apply to the average person and are not intended to represent or guarantee that anyone will achieve the same or similar results. You should always perform due diligence and not take such results at face value. We are not responsible for any errors or omissions in typical results information supplied to us by third parties. If a product or service is new, you understand that it may not have been available for purchase long enough to provide an accurate results history. Again, it is possible that even with perfect use of the program, you will not achieve the results described in

testimonials. They are meant to be a showcase of the best results the program has produced and should not be taken as the results a typical user will get. Results achieved by members are differences in your individual exercise history, genetics, and personal motivation/dedication. The end results you get will depend upon the individual and how much effort you put in.
